Electrical Engineering | Robotics & Automation

✉ Chornphilip8@gmail.com ☎ 0968298504 / 0715115979 / 069779637

📍 Toul Sangke, Phnom Penh, Cambodia

Personal Profile

Fourth-year Electrical Engineering student at the Institute of Technology of Cambodia (ITC), enrolled in the ECAM LaSalle international dual-degree program with a specialization in Robotics and Automation. Combines academic training in circuit design, microcontroller programming, and control systems with practical field experience in MEP (Mechanical, Electrical, and Plumbing) installation gained through ongoing industry employment. Has independently designed and built multiple robotics and automation projects, including a competition-winning autonomous robot, an agricultural drone, and a voice-interactive quadruped robot. Combines strong technical problem-solving ability with experience in teaching, community outreach, and cross-functional teamwork, and is seeking to apply this combined academic and practical foundation to an industrial automation and electrical engineering role.

Professional Experience

MEP Technician – HVAC & MEP Installation,

2025 – Present

B&MEP Engineering Construction Co., Ltd

- Support the installation, maintenance, and troubleshooting of HVAC systems and broader MEP (Mechanical, Electrical, Plumbing) works across active construction projects.
- Read and interpret MEP drawings and technical specifications to guide on-site installation work.
- Produce draft plans for MEP layout and installation reference, supporting accurate execution by site teams.
- Prepare Bills of Materials (BOM) and generate comprehensive project progress reports for project stakeholders.
- Coordinate with multi-disciplinary project teams (engineering, site supervision, and subcontractors) to ensure timely and accurate installation work.

Volunteer, Cambodian Red Cross & UYFN (United Youth for National Development)

2020 – 2024

- Participated in social work and community outreach activities supporting local communities.
- Facilitated public engagement programs and community events, developing organizational and interpersonal skills.

Computer Teacher, Prek Pras Sab High School

2022 – 2023

- Instructed secondary school students in Microsoft Word, Excel, PowerPoint, Illustrator, and Photoshop.
- Simplified complex technical and software concepts into accessible lessons, adapting teaching methods to different learning paces.

Education

Bachelor of Electrical Engineering – ECAM LaSalle International Program,

2023 – Present

Institute of Technology of Cambodia (ITC)

4th Year, ongoing

- Specialization track in Robotics and Automation, covering microcontroller firmware, circuit design, PID control algorithms, and industrial control systems.

- Coursework includes electrical circuit analysis, embedded systems, automation and control theory, and MEP-related electrical distribution design.

General English Program & Diploma in Creative & Critical Thinking,

2023 – 2025

ACE (Australian Centre for Education)

Completed a Completed General English Program and critical-thinking program alongside university studies, developing advanced communication and analytical skills.

Baccalaureate II (High School Diploma), Prek Pras Sab High School

2011 – 2023

Completed general secondary education, forming the foundation for further study in engineering.

Technical Skills

MEP & Electrical

HVAC & MEP installation, MEP draft plan drawing, electrical distribution systems, Bills of Quantities (BOQ) preparation, MEP material lists

Robotics & Embedded Systems

Circuit design & troubleshooting, microcontroller firmware, sensor integration, PID control, embedded programming

Software & Tools

AutoCAD, DIALux evo, KiCad, LTspice, MATLAB/Simulink, STM32CubeIDE, Arduino IDE, MS Project, Office Suite, Adobe Photoshop/Illustrator

Academic & Technical Projects

Agricultural Drone

2025 – 2026

- Designed and built an agricultural drone intended for crop monitoring and automated spraying.
- Programmed flight control logic to achieve stable, efficient coverage of farmland areas.
- Applied embedded systems and sensor integration principles to support precision-agriculture use cases.

Voice-Interactive Quadruped (4-Legged) Walking Robot

2025 – 2026

- Built a four-legged walking robot with stable, coordinated leg movement and gait control.
- Integrated voice command recognition and speech output, enabling the robot to converse with users.
- Combined mechanical design, embedded programming, and speech-interaction modules to create a responsive, user-friendly robot.

Line Follower Robot

2025 – 2026

- Designed and built a small autonomous robot capable of following a line path using infrared sensors and complete specific tasks.
- Gained hands-on experience in electronics, embedded programming, and robotics assembly.

Soft Skills

Interpersonal

Teamwork & Leadership, Adaptability

Cognitive

Critical Thinking, Problem Solving

Languages

Khmer

Native

English

Advanced (IELTS Band 6.0)

Awards & Achievements

1st Place, Line Follower Robot Competition

01/12/2025
